

Charles E. Lockhart III
CTO/COO

As Chief Technology Officer of EzQMS, Charles brings a wide range of technical development experience. Charles began his engineering career developing IT systems for a multi-billion dollar company.

Charles was then invited to become the lead developer for a new, ground-breaking medical devices company. Working with leading medical professionals in the field, he developed a world class device assisting Ear, Nose and Throat professionals in diagnosing and treating balance disorders. Eventually, he helped grow this company into the technological leader in its respective field.

Charles became Engineering Manager continuing his work leading this world class medical devices company. His responsibilities expanded to include managing the engineering, manufacturing and quality management departments.

In addition to designing developing and managing several major hardware and software projects, Charles was instrumental in guiding the company towards ISO 13485 certification and building a quality management system which satisfies all FDA requirements.

Directly being involved with FDA correspondence, safety testing, money-management, recruiting efforts, sales and support efforts has prepared Charles to lead the technological efforts of EzQMS.

Following his time at this medical devices company, Charles is involved in designing innovative patient room entertainment devices.

During his free time, Charles enjoys spending time with his family, volunteering at local schools, and playing soccer.
